I love keeping up with the latest technology trends and always looking to learn new skills and techniques to improve my work. In my free time, I enjoy creating personal projects and experimenting with new technologies. If you are interested in working together or learn more about my experience and skills, please contact me.

Skills

I already know

C Sharp (C#) 3/5	.NET Core 2/5	Blazor 2/5	Astro 2/5	Html 4/5

JavaScript 3/5	React.js 2/5	Tailwind CSS 2/5	Bootstrap 2/5	Github 3/5

SqlServer 2/5	PostgreSQL 2/5	MySQL 1/5	SQLite 3/5	Wordpress 4/5

Wix 4/5

I want to learn

Apollo GraphQL   TypeScript   Supabase   Firebase   MongoDB   ESLint   Vue.js

Angular

I speak

Spanish   native   English   C1

Work experience

Backend developer (Working student)   January 2023 - now
Freelancer

- In January did some first steps as developer using some proper HTML, CSS and JavaScript. I've developed some smaller applications.
- Around May I've extended my knowledge in backend development by developing single page applications with .NET MVC and React.

- Now I'm developing web apps and services with ASP.NET Core, minimal and web APIs, Blazor and Razor Pages, integrating a database with Entity Framework Core and SQL server.

Technologies: C Sharp (C#), .NET Core, Blazor, Github, SqlServer, Astro, Tailwind CSS, React.js

---

Wix developer   `January 2023 - February 2024`
Albote

Looking for fast deployment solutions and focused on e-commerce, I decided to work with platforms like WiX, finding in this the necessary to satisfy several clients looking for a good platform to promote and sell their products and services. I have been working with WiX for a year now, I have built 4 sites on the platform and I maintain two of them.

Technologies: Wix, Bootstrap, JavaScript

Wordpress developer   `September 2018 - October 2022`
Freelancer

I started working with Wordpress as a hobby, we had a metropolitan network in town and I was dedicated to setting up my servers and publishing articles for the local intranet. Over the years I worked in a magazine where I was involved in both roles of editor/administrator. In the last official jobs I had to develop from scratch several institutional sites for the entities I worked for.

Technologies: Wordpress, Html, JavaScript, SQLite, MySQL

Projects

Gestión Del Patrimonio   `July 2021 - November 2021`

We contribute in a sustainable way to obtaining financial resources, through trade, leasing, space management, gastronomy and recreation within the Historic Center of Havana, providing a service of quality, professionalism, uniqueness and safety, focused on the historical and heritage values of a living city.

Gestión Del Patrimonio: https://egdp.ohc.cu/

Technologies: Wordpress, JavaScript, MySQL

Baldly   `February 2024 - now`

Baldly is an Url Shortener made with simplicity in mind.

Demo: https://baldly.somee.com

Repository: https://github.com/AMnotPM/Baldly

Technologies: C Sharp (C#), .NET Core, SqlServer, Bootstrap
